Big Data made simple everywhere

Sponsored by Databricks this project is aimed to make data scientists productive on the go. For Capstone 2016, we built the Databricks Mobile Platform.

Product Highlights

Notifications
Acts as a hub to notify and manage system messages

Quick Actions
With quick actions important actions are just one-click away

Real Time Info
Access to real time information helps data scientists quickly obtain current task status

Iterative Design Process

Research
Identified key mobile use cases & user scenarios

Design
Designed based on user needs & prioritized features

Evaluate
Validated design concepts & fixed usability issues

Prototype
High fidelity interactive prototype
